1.Organisation Overview

Name Of Organisation

-Precision Golf Hub

Brief History of the Organisation

Precision Golf Hun is a fictional South African sports technology and equipment service company founded in 2024 March. The organisation was created to address common challenges faces by golfers:

- **Limited access to professional equipment fitting**
- **Reliable equipment solutions**
- **Convenient service booking**

Many amateur and even experienced golfers struggle to find the correct equipment suited to their swing style, body posture and level of play. Most golf courses and country clubs offer limited equipment services, forcing golfers to search across multiple stores and service providers.

Precision Golf Hub was created as a digital first platform that connects golfers with professional club fitting services, personalised equipment solutions and expert guidance .The organisation partners with local golf courses ,country clubs and equipment specialists to create a central platform where golfers can book services, order customised equipment and access educational resources.

Through this platform, golfers can improve their performance, make better equipment decisions and conveniently access services that were previously difficult to find.

Mission Statement

To empower golfers of all skill levels by providing accessible, personalised and professional golf equipment services through an innovative digital platform.

Vision Statement

To become South Africa's Leading digital platform for golf equipment services and customisation, connecting golfers, golf clubs and equipment specialists in one integrated ecosystem.

Target Audience

This website will primarily target the following groups:

1. **Amateur and Beginner Golfers**

Individuals who are new to the sport and require guidance on selecting the right equipment and understanding golf gear.

2. **Professional and Experienced Golfers**

Golfers who want custom club fitting, personalised equipment and performance optimisation.

3. **Golf Club Members**

Members of country clubs and golf clubs who want convenient access to equipment services and personalised gear.

4. **Golf Courses and Country Clubs**

Golf clubs that want to provide additional equipment services and convenience to their members through partnerships with the platform.

2.Website Goals and Objectives

Primary Goals of the Website

- **Provide a Centralised Equipment Service Platform:** The website will act as a hub where golfers can access multiple services in one place, including club fitting, equipment advice and custom product ordering.
- **Increase Accessibility to Golf Equipment Services:** The platform will allow users to book services online eliminating the need for golfers to search for different providers.
- **Educate Golfers About Equipment:** The website will include guides, tutorials and recommendations to help golfers choose equipment that suits their skill level and swing style.
- **Facilitate Partnerships with Golf Clubs:** The website will allow golf courses and country clubs to integrate equipment services for their members through partnerships with the platform.

Key Website Features

The website will include the following key features:

- Online Club Fitting Booking System
- Custom Golf Ball Ordering
- Equipment Recommendation Guides
- Golf Equipment Blog and Tips Section
- Partnership Listings for Golf Courses and Country Clubs
- Service Request Forms
- Member Accounts for Golfers

Key Performance Indicators (KPIs)

The success of the website will be measured using the following KPIs:

Website Traffic

The number of visitors accessing the platform monthly.

Service Bookings

The number of club fitting appointments and service requests made through the website.

Custom Equipment Orders

The number of personalised golf balls and equipment orders places on the platform.

Partner Golf Clubs

Number of golf clubs and country clubs partnering with Precision Golf Hub.

User Engagement

Metrics such as:

- Time spent on the website
- Number of pages visited
- Downloads of equipment guides

3.Current Website Analysis

Existing Website

Precision Golf Hub is a newly established organisation and currently does not have an existing website. As a startup platform designed to improve access to golf equipment services the organisation is in the early development stage of its digital presence.

Because the organisation is hypothetical and still in the planning phase there is no current website available for analysis. Therefore, to better understand industry standards and identify opportunities for improvement, a competitor website analysis was conducted.

The purpose of analysing competitor website is to evaluate existing solutions in the golf equipment and services industry and identify strengths, weaknesses and gaps that the proposed Precision Golf Hub website can address

Competitors Website Analysis

To understand the current digital landscape of golf equipment services, three similar websites were analysed. These websites provide golf equipment sales, club fitting services and golf related products.

Website	Strength	Weaknesses
American Golf	Large catalogue of gold equipment, trusted brands, clear product description	Limited personalised equipment recommendation, no online club fitting booking system
PGA Tour	Offers professional fitting services and expert advice	Website design is outdated, limited educational content for beginner golfers
Golf Digest	Easy online shopping experience and equipment variety	No integration with golf courses or country clubs, limited customisation options.

The analysis shows while many websites provide golf equipment products, few offer centralised platform that integrates services, education and partnerships with golf clubs.

Key Weaknesses Identified

From the competitor analysis, several common weaknesses were identified across existing websites:

-Lack of Online Service Booking

Many websites do not provide a convenient way for golfers to book club fitting appointments or equipment services online requiring customers to call or visit the store in person.

-Limited Equipment Education Resources

Most websites focus primarily on selling products rather than educating golfers how to choose the right equipment based on skill level, swing style or playing conditions

-Poor Personalisation Options

Existing websites offer limited options for customising golf equipment, such as personalised golf balls or equipment tailored to individual performance needs.

-Weak Integration with Golf Clubs

Many equipment retailers operate independently from golf courses and country clubs, meaning golfers must search for services separately. This lack of integration creates inconvenience for club members.

Opportunity For The proposed website

The proposed Precision Golf Hub website aims to address the weaknesses identified in competitor websites by providing a centralized and user-friendly digital platform for golfers

The platform will introduce several improvements, including:

-Online booking for golf club fitting and equipment services, allowing golfers to easily schedule appointments

-Educational resources and equipment guide to help golfers make informed purchasing decisions

-Customisation Features, enabling users to personalise golf balls and equipment according to their preferences.

-Partnership integration with local golf courses and country clubs, allowing club members to conveniently access equipment services through the platform.

By combining equipment services, product customisation, educational content and partnerships into one platform, Precision Golf Hub aims to provide a more convenient and comprehensive digital experience for golfers.

4. Proposed Website Feature and Functionality

The Precision Golf Hub website will be designed as centralised digital platform that provides golfers with easy access to equipment service, personalised products and expert guidance. The website will focus on usability, accessibility and functionality to ensure a seamless user experience.

Core Website Pages

The website will include the following essential pages:

Homepage

The homepage will serve as the main entry point and provide an overview of the platform.

Features:

- Introduction to Precision Golf Hub
- Navigation menu to all major sections
- Highlights services (club fitting, custom equipment, partnerships)
- Call-to-action buttons
- Featured content (tips, promotion partner golf clubs)

About Us Page

This page will provide background information about the organisation

Features:

- Company history
- Mission and vision statement
- Overview of service offered

Services Page

This page will detail all services offered by the platform.

Features:

- Golf club fitting services
- Equipment repairs
- Consultation and expert advice

- Clear descriptions of each service
- Option to proceed to booking

Products Page

An e-commerce section where users can browse and purchase equipment.

Features:

- Golf equipment catalogue (clubs, balls, accessories)
- Products descriptions and pricing
- Customisation options (e.g., personalised golf balls)

Booking Page

A dedicated page for scheduling services.

Features:

- Online booking system for club fitting appointments
- Selection of date, time and location
- Option to choose partner golf clubs
- Booking confirmation system

Equipment Guide/Blog Page

An educational section to support golfers.

Features:

- Articles and guides for beginners and professionals
- Equipment selection tips
- Performance improvements advice

Contact Us Page

This page will allow users to communicate with the organisation.

Features:

- Contact
- Email and phone details
- Location information
- Social media links

Key Website Functionalities

The website will include the following important functionalities:

Online Booking System

Users will be able to schedule golf club fitting sessions and equipment services online, improving convenience and accessibility.

Responsive Design

The website will be fully responsive, ensuring accessibility on:

- Mobile devices
- Tablets
- Desktop computers

Content Management System (CMS)

The platform will allow administrators to:

- Update blog content
- Manage products and services
- Add partner golf clubs

Integration with Partner Golf Clubs

The website will allow:

- Booking services through partner golf clubs
- Display of partner locations
- Improve service accessibility for members

The proposed website will combine service booking, e-commerce, education and partnerships into a single platform. This integrated approach will provide golfers with a convenient,

informative and personalised experience, setting Precision Golf Hub apart from existing solutions.

5.Design and user experience

The design of the Precision golf hub website will focus on professionalism and premium sports feel, reflecting the nature of golf as a high-end and precision-driven sport. The user experience will prioritise ease of navigation, clarity of information and seamless interaction.

Colour Scheme

The color scheme will reflect elegance, trust and performance

Primary Colour: Dark Green – Represents golf courses, nature and professionalism

Secondary Colour: White – Ensures a clean and minimal interface

Accent Colour: Gold – Conveys premium quality and exclusivity

Neutral Colours: Light Grey / Black – Used for text, backgrounds and contrast

Typography

The typography will ensure readability and visual hierarchy

- Headings (H1, H2): San – serif font. Large, bold and attention grabbing
- Subheading (H3, H4): Medium-weight sans-serif. Clear section separation
- Body text: Clean, simple sans-serif. Easy to read on all devices
- Call-To-Action Buttons: Bold and slightly larger text. Encourages interaction.

Layout and Design

The website will follow a modern, minimal and structured layout.

Key design principles:

- Grid-based layout for alignment and consistency
- Whitespace usage to avoid clutter
- Card-based sections for products and services
- Clear section separation using spacing and headings
- Visual hierarchy to guide user attention

Design style:

- Clean and uncluttered
- Professional and premium
- Sports-focused but modern
- Mobile-first design approach

User experience considerations

The website will be designed to ensure a smooth and intuitive user journey.

Easy Navigation

- Simple top navigation menu
- Clearly labelled pages
- Sticky navigation bar for easy access

Clear Call-to-Action

- Book a fitting
- Shop equipment
- Get advice

Fast Access to key services

User should be able to book a service in a few clicks

Able to find products quickly

Access guides without confusion

Mobile Responsiveness

- Optimised for smartphones and tablets
- Touch-friendly buttons
- Responsive layouts

Consistent Design

- Same colours, fonts and layout across all pages
- Predictable user interface

Accessibility

- Readable font sizes
- Good Colour contrast
- Simple language

6. Technical Requirements

The development of the Precision Golf Hub website will require appropriate hosting, domain configuration and technology choices to ensure performance, scalability and security. This section outlines the technical components needed to build and maintain the platform.

Domain Name Requirements

The domain name should be simple, memorable and relevant to the business

Proposed Domain Options

- www.precisiongolfhub.com
- www.pgolfhub.co.za
- www.precisiongolf.co.za

Requirements:

- Easy to spell and pronounce
- Relevant to golf and services offered
- Preferably . co.za domain for south African targeting
- Secure with SSL certificate (HTTPS)

Hosting Requirements

The website will require reliable hosting to ensure high availability, fast loading speed and security

Hosting Type:

- Cloud Hosting
- Shared Hosting

Suggested hosting Providers

- Amazon web services
- Afrihost
- HostAfrica

Hosting features Required

- High uptime
- Fast load speed

- Scalable infrastructure
- Secure servers (SSL SUPPORT)
- Backup and recovery options

Front-End Technologies

The front-end is responsible for the visual appearance and user interface of the website.

Technologies

- **HTML** – Structure of web pages
- **CSS** – Layout, colour and responsiveness
- **JavaScript** – Interactivity and dynamic content

Optional Framework

- CSS Framework for faster design
- JavaScript libraries for enhanced interactivity

The proposed website will be developed using modern front-end technologies, including HTML, CSS and JavaScript to ensure a responsive, interactive and visual appealing user interface.

The platform will be supported by a reliable hosting and an appropriate domain to ensure accessibility and performance. While back-end functionality is not included within the scope of this project, key features such as booking systems and product interactions will be simulated using front-end techniques.

7. Timeline and Milestones

The development of the Precision Golf Hub website will follow a structured timeline to ensure that all phases of the project are completed efficiently and on schedule. Each phase includes specific milestones to track progress and ensure successful completion.

Project Timeline Overview

Week	Phase	Activities	Milestone
Week 1	Project Planning	Define project idea, objectives and proposal structure	Proposal draft completed
Week 2	Research & Analysis	Competitor analysis, user needs, content planning	Research section completed
Week 3	Design Phase	Create wireframe	Wireframes completed
Week 4	Front-End Development (Part 1)	Build basic structure using HTML	Website structure completed
Week 5	Front-End Development (Part 2)	Apply CSS styling and responsive design	Styled and responsive layout completed
Week 6	Front-End Development (Part 3)	Add JavaScript functionality	Interactive features completed
Week 7	Testing and Refinement	Test website functionality, fix errors and improve UX	Fully functional website
Week 8	Finalisation and Submission	Prepare final documentation and submit	Final project submitted

Key Milestones

Proposal Completion

- All sections (1-6) completed and reviewed
- Approved project direction

Wireframe & Design Approval

- Low-fidelity wireframes created
- Layout and structure finalised

Website Structure Development

- All main pages created using HTML
- Navigation system implemented

Visual Design Implementation

CSS styling applied

- Colour scheme and typography implemented
- Responsive design completed

Functionality Integration

JavaScript added for:

- Booking simulation
- Form validation
- Interactive elements

Testing Phase

- Cross-browser testing
- Mobile responsiveness testing
- Fixing layout and functionality issues

Final Submission

- Website completed
- Documentation finalised
- Project submitted on time

The project timeline ensures a step-by-step development process, start from planning and research to design, development, testing and final submission. By following this structured approach, the Precision Golf Hub website can be completed efficiently while high quality and meeting academic requirements.

8.Budget

The development of Precision Golf Hub website will require an estimated budget covering development, hosting, domain registration and maintenance. Although this project is academic and will be developed using front-end technologies, the budget reflects real-world costs based on current market estimates.

Development Costs

Since the website will be developed using HTML, CSS and JavaScript, development costs are estimated based on hiring a junior web developer or freelance services.

Item	Description	Estimated Cost
Website Design & Development	Front-end development of all pages and features	R8000 – R15000
UI/UX Design	Wireframes and layout design	R2000 – R5000
Testing & Debugging	Ensuring functionality and responsiveness	R1000 – R 3000

Subtotal : R 11000 – 23000

Domain and Hosting Costs

Domain Registration

- .co.za domain: R100 – R200 per year

Hosting Services

Using providers such as Afrihost or HostAfrica:

Item	Description	Estimated Cost
Web hosting	Shared or basic cloud hosting	R1200 – R 3000
SSL Certificate	Secure HTTPS connection	Often free or up to R500

Subtotal: R 1300 – R 3500

Maintenance Costs

Ongoing maintenance ensures the website remains functional and updated.

Item	Description	Estimate
Content Updates	Updating blog posts, products and services	R 2000 – R 5000

Technical Maintenance	Fixing bugs and performance improvements	R 2000 – R 4000
Hosting Renewal	Annual hosting fees	Included above

Total Estimated Budget

Category	Estimated Cost
Development (Once off)	R11000 – R 23000
Annual Hosting & Domain	R1300 – R3500
Annual Maintenance	R4000 – R9000

Cost Considerations for This Project

For this academic project, the development will be done by the student meaning there will be no actual cost; free tools and local hosting may be used, and some features will be simulated. However, the above budget reflects a realistic cost if the website were developed commercially.

The estimated budget demonstrates that developing and maintaining the Precision Golf Hub website is financially feasible within a moderate range. By using modern front-end technologies and scalable hosting solutions, the platform can deliver high value at a reasonable cost, making it suitable for both startup and growth phases.

Conclusion

The Precision Golf Hub website proposal presents a comprehensive solution to the challenges faced by golfers in accessing equipment services, personalised products and reliable guidance. The platform is designed to act as a centralised digital hub, integrating service booking, product customisation and educational resources into a single, user-friendly interface

Through careful planning, the proposal has outlined key aspects of the project, including organizational goals, competitor's analysis, website features, design considerations, technical requirements, timeline and budget. The use of modern front-end technologies such as HTML, CSS and JavaScript ensures that the website will be responsive, interactive and aligned with current web development standards.

The proposed design focuses on usability, accessibility and premium user experience, while the inclusion of simulated functionalities demonstrates how real-world systems such as booking and product interaction would operate. Additionally, the integration of partnerships with golf clubs strengthens the value proposition of the platform.

Overall, this project demonstrates the ability to apply web development knowledge in a practical context while addressing real-world challenges. The Precision Golf Hub website has the potential to significantly improve convenience and decision-making for golfers, making it a valuable and innovative solution within the golf industry.
